

CRAFTING COMPETENCE

Training Tomorrow's Air
Monitoring Technicians

South Coast
AQMD

Rene M. Bermudez
Atmospheric Measurements
Manager
South Coast AQMD

2024 PQAO Training
February 27-28, 2024

OVERVIEW

- ▶ Background
- ▶ Organizational Structure
- ▶ Objectives, Goals and Key Components
- ▶ South Coast AQMD Monitoring Network (MN)
Air Quality Instrument Specialist (AQIS) Training
Program
- ▶ Assessing Performance
- ▶ Final Thoughts

BACKGROUND

- ▶ Challenges: Common Reasons Why We Lose Staff
 - ▶ Promotions
 - ▶ Within the agency
 - ▶ Retirement
 - ▶ Departure of institutional knowledge
 - ▶ Departure from Agency
 - ▶ State and local agencies

BACKGROUND

▶ Employee Retention Strategies

- ▶ Hire The Right People
- ▶ Allot responsibilities Wisely
- ▶ Appreciate Good Work
- ▶ Performance Appraisals
- ▶ Work Life Balance
- ▶ Appropriate Training
- ▶ Cultivate Team Spirit!

BACKGROUND

- ▶ Opportunities
 - ▶ Hire The Right People
 - ▶ Industrial/oil refinery/oil field experience
 - ▶ Hands on, mechanical experience
 - ▶ Electronics/troubleshooting
 - ▶ Philosophy
 - ▶ Ownership/self starters

AQIS Attributes

Thank you for your effort to sit on this panel. Asst AQIS and AQIS I are entry level positions, but is one of the most important because it helps us build a solid base of staff who will rise to senior positions within the group. Identifying staff with the following attributes will help ensure we have adequate candidates for promotional recruitments. The most qualified candidates will have the following attributes:

- A sense of responsibility
 - Field operators work alone on a daily basis.
 - Care about the quality of their work
- Team player, works well with others
 - Having open communication between operators helps to recognize, and resolve issues before they become widespread
- Awareness of what their role has been in the previous positions and having made an effort to make things better
 - Care about customer service, understanding that by producing data, we are providing a service to the AQMD planners, general public, and researchers.
 - Operators are arguably, one of the most important jobs. Understanding EPA sighting requirements and procedures can help prevent data loss. We look to operators to identify issues before they become big problems.
- Desire to learn more
 - Operators are always being exposed to new instrumentation and procedures, how well they do is related to their desire to learn more
- Hands on type of person
 - Site operators perform diagnostic tests, basic maintenance, and basic troubleshooting.
 - Working at a refinery
 - Working on cars, mechanical projects etc.
- Ability to prioritize
 - At times the workload is overwhelming, establishing priorities is essential to completing work.

ORGANIZATIONAL STRUCTURE

- ▶ Organizational Structure and Roles for Air Quality Instrument Specialists (AQIS)
 - ▶ Assistant AQIS – BioWatch Program
 - ▶ Perform daily collections of filters
 - ▶ Documentation and filter delivery to lab
 - ▶ AQIS I – Operations, Daily Site Maintenance
 - ▶ Level 1 data validation
 - ▶ Documentation
 - ▶ Instrument diagnostics, site maintenance, load filter media
 - ▶ Sr. AQIS – Operation and Team Senior Staff
 - ▶ Provide guidance, training strategy
 - ▶ Monitors training progress and performance

OBJECTIVES, GOALS AND KEY COMPONENTS

▶ Objectives

- ▶ Ensure AMT Staff Training and Performance
- ▶ Maintain a Robust Training Program
- ▶ Promote Cross Training

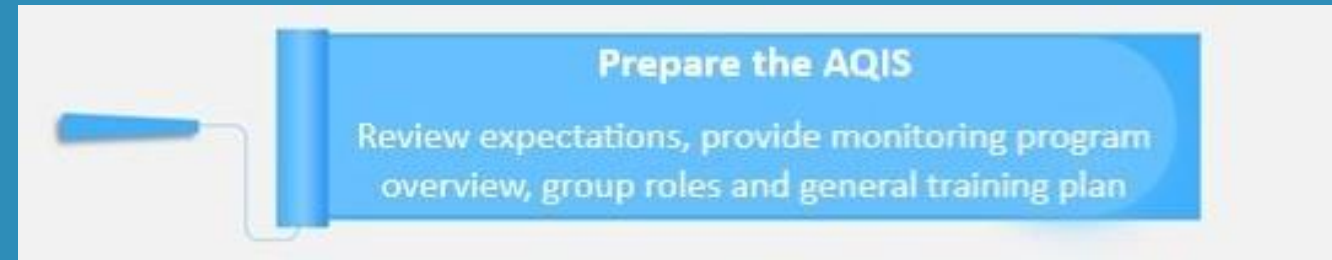

▶ Goals and Key Components

- ▶ Maintain Data Completeness
- ▶ Proficiency Metrics
- ▶ Promote Redundancy
 - ▶ Backup staffing

SOUTH COAST AQMD TRAINING PROGRAM

- ▶ Training Phase One:
Prepare the AMT
 - ▶ Meet with Every New Employee
 - ▶ Review Expectations for Position
- ▶ Overview of Monitoring Programs
 - ▶ BioWatch Network
 - ▶ Emphasize they will receive cross training

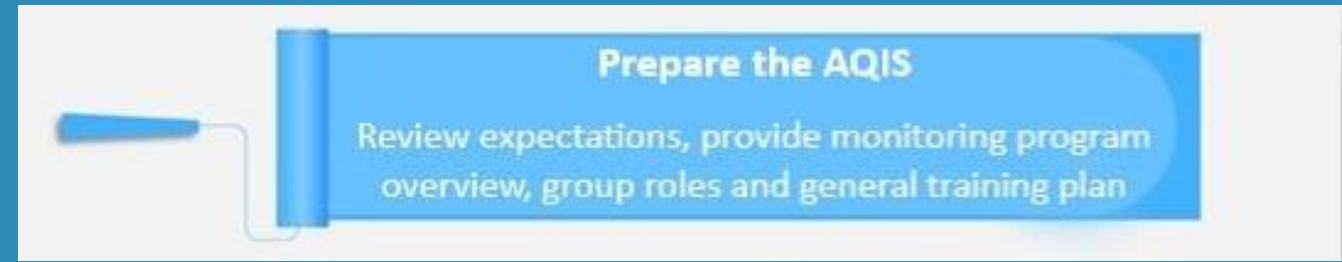

Operations AQIS I

This is intended to be a Living document, updated as needed and as situations change; please notify the Principal AQIS as responsibilities are added. These are meant as a starting point, this assignment is what you make of it. There will be many other projects, or assignments depending on your skill set and your desire to make the most of your position.

- 1) Prioritize work daily.
- 2) Understand pollutant trends, and how data is used by our customers.
- 3) Review nightly spans on DMS and Airvision each morning for instrument performance issues.
- 4) Documentation issues at monitoring sites in logbooks.
- 5) Understand data collection and QC procedures and system.
- 6) Understand how to use tools available to perform job.
 - a. Cellular phone hotspot
 - b. Laptop and software (VPN)
 - c. Data Management system (DMS)
 - d. Airvision
- 7) Study and understand instrument diagnostics and what they mean to data quality
- 8) Complete Monthly Maintenance sheets and indicate issues with the monitors by the second week of the following month.
- 9) Be familiar with operational SOPs.

SOUTH COAST AQMD TRAINING PROGRAM (CONTINUED)

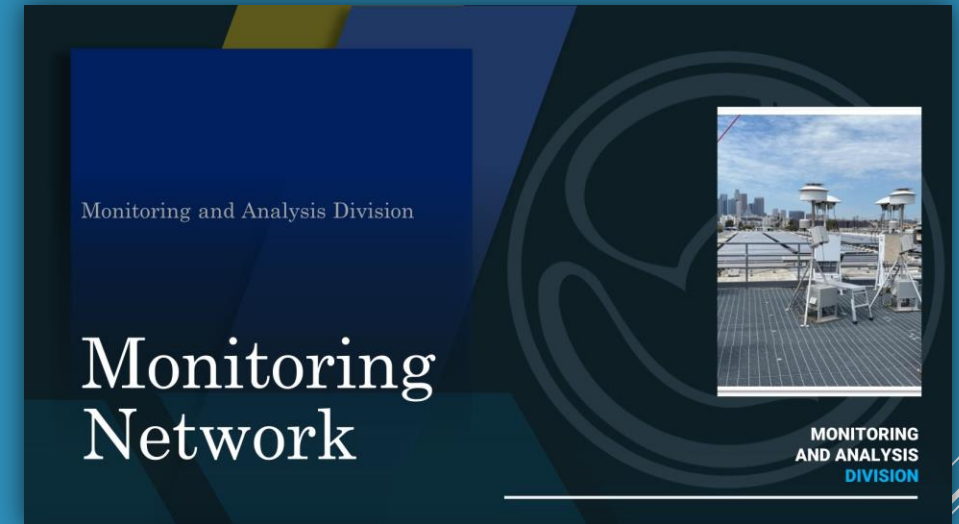

- ▶ Monitoring Network Review
 - ▶ Criteria pollutant Network
 - ▶ U.S. EPA Role
 - ▶ CARB Role
 - ▶ South Coast AQMD Role

Prepare the AQIS

Review expectations, provide monitoring program overview, group roles and general training plan

This slide features a blue header with a white scroll effect containing the text 'Prepare the AQIS'. Below the header, the text 'Review expectations, provide monitoring program overview, group roles and general training plan' is displayed in white on a blue background. A blue handle is visible on the left side of the scroll.

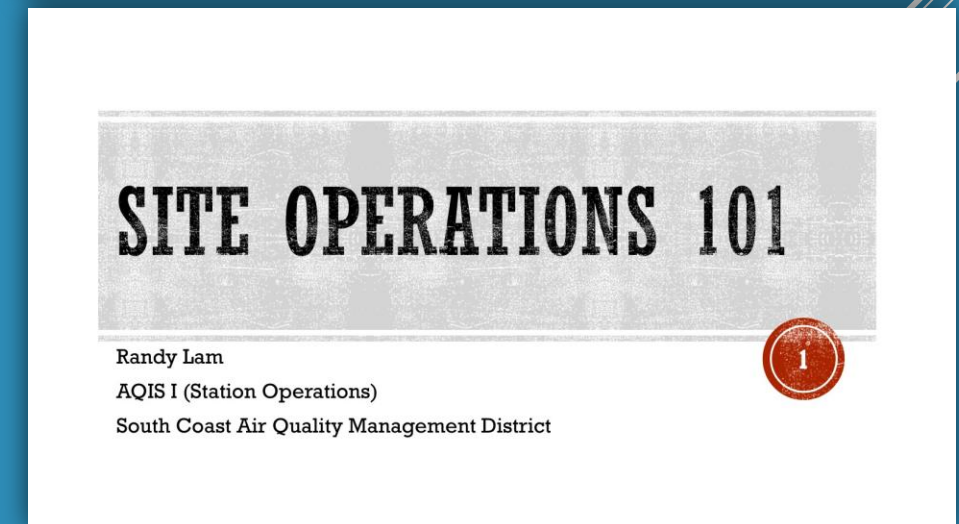

Monitoring and Analysis Division

Monitoring Network

MONITORING AND ANALYSIS DIVISION

This slide has a dark blue background with a large, faint circular logo. The text 'Monitoring and Analysis Division' is in the top left. The title 'Monitoring Network' is in the center. On the right, there is a photograph of an outdoor monitoring station with various instruments on a rooftop. Below the photo, the text 'MONITORING AND ANALYSIS DIVISION' is repeated in a smaller font.

SITE OPERATIONS 101

Randy Lam
AQIS I (Station Operations)
South Coast Air Quality Management District

This slide has a white background with a grey textured header containing the title 'SITE OPERATIONS 101'. Below the header, the presenter's name 'Randy Lam', title 'AQIS I (Station Operations)', and organization 'South Coast Air Quality Management District' are listed. A red circular icon with the number '1' is located in the bottom right corner.

SOUTH COAST AQMD TRAINING PROGRAM

- ▶ Basic Operations AMT Training “BOAT” Operator Assistance Guide (OAG)
 - ▶ Provides Overview to New Assistant AMT staff
 - ▶ References Standard Operating Procedures (SOPs)

Version 1.0
Page 1 of 4

Title: QA0096_Basic Operations AQIS Training

Author/Title: John Simone / Senior Air Quality Instrument Specialist

Purpose/Background:

The purpose of this Operation Assistance Guide (OAG) is to give an overview to new Air Quality Instrument Specialists (AQIS), in the basic concepts of operations of the Air Monitoring Network. This Basic Operations AQIS Training (BOAT) OAG sets general expectations for the Trainer and Trainee to complete station operations overview training. The goal is to provide introductory training to new AQIS Staff so that they can be exposed to the duties and responsibilities involved in the operation of the Air Monitoring Network Sites. This will allow these new employees to the Air Monitoring Network to have a broad understanding of the concepts and procedures involved, so that they can make best use of formal training programs.

1. Following the framework and guidance of *SOP00181_AM_Monitoring Network Training* the Program will provide the roadmap for the station operator responsibilities on all instrumentation within the South Coast AQMD air monitoring network.

Electronic File Name: QA0096_Basic Operations AQIS Training_V1.0

SOP Reference: *SOP00181_AM_Monitoring Network Training*
SOP00116, General Air Monitoring Station Operations

Contacts: Amanda James (x3528) ajames@aqmd.gov
Juan Garcia (x3186) jgarcia@aqmd.gov
John Simone (x2482) jsimone@aqmd.gov

Equipment/Software/Consumables:

- South Coast AQMD Laptop w/AQMD Document Distribution
- Operation's Standard Operating Procedures (SOP)
- Operation's Operator Assistance Guides (OAG)

Responsibilities

The responsibilities for the BOAT Program are listed below for the Trainee and Senior Staff. Instruction will follow all applicable Standard Operating Procedures (SOP) or Operator Assistance Guides (OAG) for Station, or instrumentation being trained on.

1. Trainees will be new AQIS Operators that are either new hires or have been transferred from the Federal Monitoring Program or other South Coast AQMD divisions. These Operators in Training will be scheduled to participate in a series of training sessions including power point presentations, instrument demonstrations and a monitoring site visit.
2. As a trainee in the BOAT Program, the trainee shall; read corresponding SOP or OAG documentation, ask questions, take notes as appropriate, be on time, and assist in documenting training in a timely manner working with the Trainer.

SOUTH COAST AQMD TRAINING PROGRAM

- ▶ BOAT Training Guidelines
 - ▶ Senior Staff Provide Training
 - ▶ Responsible for following training table
 - ▶ Responsible for documentation of training
 - ▶ Provides a daily topic for discussion/training based on SOPs/OAGs
 - ▶ Demonstrate procedures as defined in SOP/OAGs for proficiency before next phase of training

QA0089_Comprehensive Operations AQIS Station Training

August 3, 2023
Version 1.0
Page 1 of 5

Title: QA0089_Comprehensive Operations AQIS Station Training

Author/Title: Amanda James / Senior Air Quality Instrument Specialist

Purpose/Background:

The purpose of this Operation Assistance Guide (OAG) is to provide guidance in the training of new Air Quality Instrument Specialist (AQIS) into the Operations of the Air Monitoring Network. The Comprehensive Operations AQIS Station Training (COAST) program sets expectations for the Trainer and Trainee to complete comprehensive station operations training. The goal is to provide the comprehensive training to new AQIS Staff so that Senior Staff can rate them as proficient in the duties and responsibilities involved in the operation of the Air Monitoring Network Sites.

1. Following the framework and guidance of *SOP00181_AM_Monitoring Network Training* the COAST Program will provide the roadmap for the station operator responsibilities on all instrumentation within the South Coast AQMD air monitoring network.

Electronic File Name: QA0089_Comprehensive Operations AQIS Station Training V1.0

Contacts: Amanda James (x3528) ajames@aqmd.gov
Juan Garcia (x3186) jgarcia@aqmd.gov
John Simone (x2482) jsimone@aqmd.gov

Equipment/Software/Consumables:

- South Coast AQMD Laptop w/AQMD Document Distribution
- Operation's Standard Operating Procedures (SOP)
- Operation's Operator Assistance Guides (OAG)

Responsibilities

The responsibilities for the COAST Program are listed below for the Trainee, Trainer, and Senior Staff. Instruction will follow all applicable Standard Operating Procedures (SOP) or Operator Assistance Guides (OAG) for Station, or instrumentation being trained on.

1. Staff responsible for operations of the stations are classified as Assistant Air Quality Instrument Specialist (AQIS) or higher classification. For the purpose of this document, they will be referred to as the AQIS Operator.
2. Trainees will be new AQIS Operators that will be assigned to a Trainer to serve as a mentor for the purposes of training. Follow appropriate SOP or OAG documentation, ask questions, take notes as appropriate, be on time, and assist in documenting training in a timely manner working with the Trainer.

SOUTH COAST AQMD TRAINING PROGRAM

- ▶ COAST Training Guidelines
 - ▶ Site Operator Mentors new AMT
 - ▶ Responsible for following training table
 - ▶ Responsible for completing individual training form
 - ▶ Demonstrate processes outlined in SOPs/OAGs
 - ▶ Observe trainee perform processes in SOPs/OAG and provide update to Senior AQIS
 - ▶ Senior AQIS
 - ▶ Assign certified AQIS I trainer
 - ▶ Follow up on progress
 - ▶ Ensure documentation is completed
 - ▶ Conduct proficiency observations once training is completed

ASSESSING PERFORMANCE

Performance Strengths and Weakness

Plan

- ▶ Setting Expectations
- ▶ SOP/OAG Proficiency Testing
 - ▶ Upon completion of COAST

Manage

- ▶ Senior Oversight of AMT Staff
 - ▶ Ongoing monitoring of performance
- ▶ Refresher Training
 - ▶ SOP updates
- ▶ Communication
 - ▶ Lab/QA/MN Meetings
 - ▶ Quarterly meetings
 - ▶ Training component

ASSESSING PERFORMANCE

Review

- ▶ Data Completeness
 - ▶ As a metric of performance to determine areas for improvement

Reward

- ▶ Performance Appraisal Process
 - ▶ Review performance, establish goals and career development
 - ▶ Recognize commendable performance
- ▶ Foster a Team Culture
 - ▶ Semi-annual group activities

Renew

- ▶ Evaluate Process

SUMMARY

- ▶ Challenges
 - ▶ Retention
 - ▶ New Staff
 - ▶ Opportunities
- ▶ Objectives
 - ▶ Ensure AQIS Staff Training and Performance
- ▶ Goals and Key Components
 - ▶ Maintain a High Level of Data Completeness
 - ▶ Robust Training Program
- ▶ South Coast AQMD MN AQIS Training Program
 - ▶ BOAT / COAST
- ▶ Assess Effectiveness
