

CALIFORNIA
AIR RESOURCES BOARD

Quality Assurance District Access Page

Presented by Eric Burton, Air Pollution Specialist

Quality Assurance Section, Monitoring & Laboratory Division

February 28, 2024

District Access Page

A California Air Resources Board (CARB) website page where information from the quality assurance database is available to agencies, related to their air monitoring sites.

<https://ww2.arb.ca.gov/applications/quality-assurance-district-access-page>

How do we get there?

- ❖ Google it!
- ❖ Use your bookmark!
- ❖ Check the link at the bottom of the cover page on your Audit Reports.

The screenshot shows the California Air Resources Board (CARB) website. At the top, there is a dark blue navigation bar with social media icons (CA.GOV, Twitter, YouTube, LinkedIn, Email) and links for Calendar, FAQs, Contact, Careers, and Subscribe. A search bar on the right contains the text "SEARCH CARB" and a magnifying glass icon. Below the navigation bar is the CARB logo and a horizontal menu with links for ABOUT, OUR WORK, RESOURCES, SERVICES, RULEMAKING, NEWS, and EQUITY. The main content area is titled "Quality Assurance District Access Page" and includes a sub-heading "Reports and Information". A paragraph of text reads: "To access an individual air monitoring agency's reports and site information, please select an air monitoring agency from the pull down menu and type in the associated password. If your district password is unknown, please contact your District Liaison." Below this text is a form with a dropdown menu labeled "-- Select Your District --", a text input field labeled "PASSWORD:", and a "Submit" button.

Logging into the District Access Page

- ❖ Access is available to appropriate District personnel with password.
- ❖ To get your password:
Contact your liaison, me, or QA-audits@arb.ca.gov.
 - If you're a site operator, an email granting permission should be sent through your supervisor.
 - Use PQAQO Liaison links or the "Contact QAS" link.
- ❖ Select your District/Agency, enter your password.

Reports and Information

To access an individual air monitoring agency's reports and site information, please select an air monitoring agency from the pull down menu and type in the associated password. If your district password is unknown, please contact your [District Liaison](#).

District Reports and Information

The California Air Resources Board's (CARB) Quality Assurance Section (QAS) conducts comprehensive quality assurance activities within air monitoring districts throughout California. Data is gathered from various sources, including the U.S EPA's Air Quality System (AQS) and in-field activities such as annual (and semi-annual) performance evaluations. Information is collated into the QAS Audit Information System and is used to produce site (information) dossiers and Performance Audit Reports. Basic information about Corrective Action Notifications can also be found below.

Performance Audit Program: The performance audit program is designed to assess the accuracy of the total measurement system. Known concentrations of standard gases are introduced to the instrument at the station probe inlet. Particulate samplers and meteorological sensors are audited using NIST-certified flow standards and sensors.

Final audit reports and a site dossier for each site are available in the table below. Staff are encouraged to verify their site information in the U.S. EPA's AQS database and in CARB's Site Information database by checking their Site Dossier. QAS staff update the dossiers with information from AQS approximately twice per year. The last update was performed on November 14, 2022.

Note: If discrepancies with CARB's database or AQS are identified, contact your [District Liaison](#), or [Eric Burton](#), in CARB's Quality Assurance Section, for assistance.

Note: To correct viewing and printing issues with Field Audit Reports, use the Microsoft Edge browser.
